

广东海鸥医疗器械股份有限公司

Guangdong Haiou Medical Apparatus Co., Ltd.

企业简介

COMPANY INTRODUCTION

广东海鸥医疗器械股份有限公司(简称 "海鸥医疗"),是专业从事无菌医疗器械产品研发、生产、销售、服务的创新型 科技企业,国内领先的安全注射器械制造商。

公司创建于 1997 年,属国家食品药品监督管理局审批认可的无菌医疗器械专业生产厂家。作为专注于安全医疗器械研发的领先企业,海鸥医疗为世界提供安全的注射解决方案。同时,积极倡导医疗机构使用安全类医疗器械,确保病人及医务人员的健康安全得到更有效防护。

公司通过国际质量体系 ISO13485 认证,主导产品通过欧盟 CE 认证,自毁式注射器、安全式注射器获得了世界卫生组织 (WHO)PQS 认证,安全式注射器还通过了美国 FDA 510 (k) 的上市前审查。经过多年的市场推广,产品远销欧洲、美洲、东南亚、中东和非洲等地区,在国内也正逐步成为行业内的领先企业。

海鸥医疗将通过自身雄厚的研发实力,自主创新,使技术保持在行业领先水平,并通过不断的创新和成长,开发出更安全、高质量的医疗器械产品,为人类医疗健康事业创造出更多的价值。

Guangdong Haiou Medical Apparatus Co., Ltd. (hereinafter referred to as "Haiou Medical"), which is a High-Tech Enterprise specializing in R&D, producing, sales and services of disposable medical device, and the leading enterprise of Safety injection medical device.

Haiou Medical was established in 1997, which is a professional manufacturer of disposable medical device, approved by the China Food and Drug Administration. As a leading company focusing on the R&D of safety medical devices, Haiou Medical provides the advanced solution of safety injection in the world. In addition, we actively advocate medical institutions to use safety medical devices to ensure more effective protection of safety and health for patients and health-care workers.

The company passed the international quality system ISO13485 approval, and main products passed with CE Certificate. Auto disable syringe and Safety syringe obtained WHO PQS Certificate, and Safety syringe also passed the FDA 510(k) Premarket Review. After years marketing, we have extended our business to Europe, America, Southeast Asia, Middle East, Africa and other region. In domestic market, Haiou Medical is gradually becoming the leading enterprise in medical industry.

Haiou Medical will through its own abundant R&D strength and independent innovation to maintain the technology on top of industry. At the same time, through constant innovation and growth, we aim to develop more safety and high quality medical device to create more value of human healthcare career.

DEVELOPMENT HISTORY

发展历程

2022年 通过知识产权体系认证;获得广东省博士工作站新设站点单位;获得专精特新中小企业 2021年 通过国家高新技术复审;获得广东省"守合同重信用"企业

2020年 荣获广东省安全输注器械工程技术研究中心单位; 获得广东省质量信用A类医疗器械生产企业

2019年 通过市工程技术研究中心认定(智能安全输注器械工程技术研究中心)

2018年 通过国家高新科技企业重新认定;通过市级企业技术中心认定

"安全自毁注射器"通过美国FDA认证,获准进入美国市场; 2015年

取得国家食品药品监督管理局颁发的多张医疗器械生产批文

2014年 海鸥医疗位于普宁市环城北路新产业园开始投建

产品线进行拓展,投入了呼吸麻醉系列产品的设计和研发

2013年 获得"国家高新技术企业"和"诚信单位"荣誉称号

安全自毁注射器通过世界卫生组织PQS预认证

2012年 获得多个实用新型、发明专利。其中刺破式自毁注射器获得"省高新技术产品"证书

2011年 海鸥医疗更名为 "广东海鸥医疗器械股份有限公司"

2009年 成为国内第二家通过世界卫生组织POS认证的注射器企业

2006年 建立以自毁注射器、安全注射器等高新技术产品为主导的生产经营路线

2005年 获得"民营科技企业证书"荣誉称号

2003年 获得欧盟 CE 证书和 ISO 13485 国际质量体系证书,进入国际市场

2002年 自毁注射器开始进行国际市场并获得国家专利证书

2000年 建立研发部,开始研发自毁注射器,走科技创新之路

1997年 普宁市海鸥医疗器械有限公司正式创建,注册商标为"铁山兰",

专业生产一次性无菌医疗器械产品

Passed the Intellectual Property System Certification; Obtained the new site unit of Guangdong Province Doctoral Workstation; Approved by Guangdong Province Specialization Refinement Differentiation Innovation Small and Medium-sized Enterprises Passed the national high-tech review; won the title of "Contract-honoring and Credit-worthy" Enterprise in Guangdong Province Awarded the Unit of Guangdong Province Safe Infusion and Injection Devices Engineering Technology Research Center; Awarded Guangdong Province Quality Credit Class A Medical Devices Manufacturer devices engineering technology research center) Passed the identification of the Municipal Enterprise Technology Center Safety syringe passed the FDA 510(k) Premarket Review to enter the America market; We obtained a plurality of license issued by the CFDA for medical devices production

Haiou Medical new Industry Park in North Puning City started construction, expanded production lines

We were awarded the honor of National Enterprise of High-New Technology and Integrity Unit Needle retractable safety syringe passed WHO PQS prequalification

We obtained a plurality of Utility Model & Invention Patents, Auto disable syringe was rated as High-New Technology product of Guangdong Province

Haiou Medical has been the second enterprise to gained WHO PQS Certificate for syringe in China

We began to establish a production line guided by the high-new technology products on Auto disable syringe and Safety syringes etc.

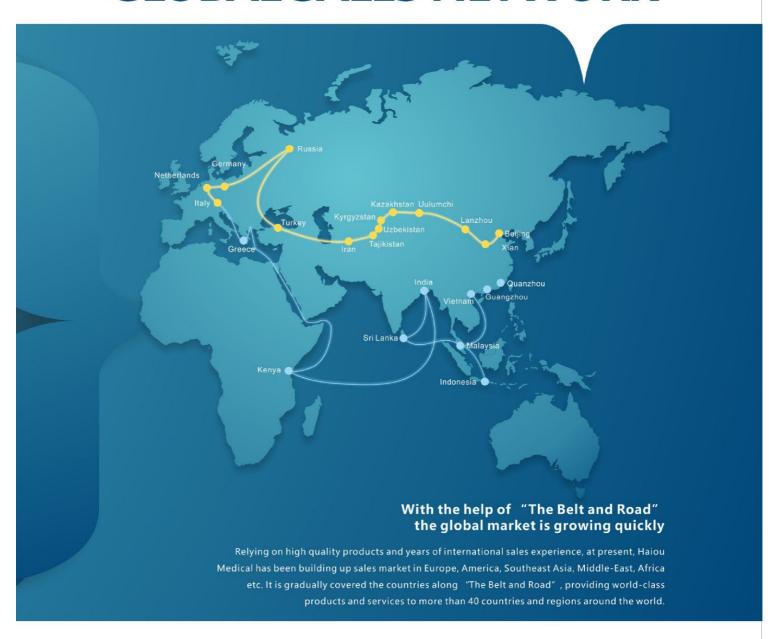

We were awarded Private Science and Technology Enterprise of Guangdong Province

Auto disable syringe began entering international market and gained the National Patent Certificate

We set up R&D Department and began to develop Auto disable syringe, taking the way of independent

Puning Haiou Medical Appliance Co., Ltd. is established, specialized in manufacturing disposable medical device with registered trademark "Tie Shan Lan"

全球销售网络 GLOBAL SALES NETWORK

借助"一带一路"的东风 全球销售网络不断拓宽

凭借过硬的产品质量 及多年的销售经验积累,目前在欧洲 美洲、东南亚、中东、非洲等地区建立了市场 逐步覆盖一带一路沿线国家 为全球四十多个国家和地区提供国际一流的产品和服务

现代化生产车间

MODERNIZED PRODUCTION WORKSHOP

海鸥拥有符合 GMP 标准的十万级净化车间 6000 多平方米, 采用先进的生产设备和试验仪器, 推行现代化工艺操作和完善的检测流程与方法, 全程通过严格的质量控制系统, 确保质量和控制产品单耗, 生产出符合标准的高品质产品。

Haiou Medical has more than 6,000 square meters GMP 100,000 grade purified workshop. Adopt advanced production equipment and test instruments. Implement modern process operations and perfect inspection processes and methods, through the strict quality control system, to ensure quality and control the unit consumption, and produce high-quality products in line with standards.

技术中心占地面积1300平方米,配有微生物实验室、化学实验室、物理实验室等,配备先进的研究开发与检测仪器设备,全程通过严格的质量控制系统,对原材料、辅助材料性能和医疗器械的各项指标进行分析和检测,为新产品开发、生产工艺的制订提供充分必要的数据,从而确保产品标准性与安全性。

Covering an area of 1,300 square meters, The Technology Center is equipped with Microbiology Labs, Chemical Labs, Physical Labs, etc, which are equipped with advanced R&D and testing instruments. Through a strict quality control system, it analyses and tests the performance of raw materials, auxiliary materials and various indicators of medical devices, providing sufficient data for new product development and production processes, so as to ensure the standard and safety of our products.

祭譽滿載 見證祭耀

海鸥医疗是中国较早通过欧盟 CE 认证和ISO13485质量体系认证的企业,也是国内第二家取得世界卫生组织PQS预认证注射器生产企业,安全注射器产品获得美国FDA认证。

Haiou Medical is one of early manufacturer which passed CE certificate, ISO13485 quality system certificate and the second manufacturer passed WHO PQS pre-qualification in China, the Safety syringe has passed the FDA 510 (k) premarket review in USA.

- 1. Does not harm the recipient;
- Does not expose the provider to any avoidable risk;
- 3. Does not result in waste that is dangerous for the community

In 2015, WHO released WHO guideline on the use of safetyengineered syringes for intramuscular, intradermal and subcutaneous injections in health-care settings, provides detailed recommendations highlighting the value of safety features for syringes. WHO is urging countries to transition, by 2020, to the exclusive use of the new "smart" syringes, on one hand to prevent syringe re-use, on the other hand to prevent health-care workers getting infected by needle stick injuries.

Injections are one of the most common health-care procedures. Every year at least 16 billion injections are administered worldwide, WHO estimated that about 40% is unsafe, in 2010, through an unsafe injection:

Up to 1.7 million people were infected with hepatitis B virus; Up to 315,000 with hepatitis C virus;

Up to 33,800 with HIV.

Other blood borne diseases transmitted through the reuse of injection equipment e.g. haemorrhagic fevers such as Ebola and Marburg viruses, malaria, and others.

"Adoption of safety-engineered syringes is absolutely critical to protecting people worldwide from becoming infected with HIV, hepatitis and other diseases. This should be an urgent priority for all countries," says Dr Gottfried Hirnschall, Director of the WHO HIV/AIDS Department.

Extracts: WHO calls for worldwide use of "smart" syringes, WHO, 2015

Haiou's Solution 🕕

As a leading company focusing on the R&D of safety medical devices, we devote ourselves to solving the unsafe injection problem in the medical institutions since 2002. We have engineered Auto retractable safety syringe, Needle retractable safety syringe and Auto disable syringe, etc.

The main advantages of new structures are the mandatory destroy after used safety retracted function. In technology, it eliminates syringe reuse and danger of needle-stick injuries. It's a technology innovation and major breakthrough in the medical field.

Needle retractable safety syringe

Infusion & Injection Series

输注器械类

| 自动回缩安全注射器 Auto retractable safety syringe

- 单手安全操作,单手激活
- 药物注射完成后自动回缩
- 自动回缩后保护针尖不暴露
- 无需增加额外操作步骤,减少培训成本
- 固定针头,无特别死腔,药液残留量低
- 减少废弃物体积及处理成本
- Single use safety with one handed operation;
- Fully auto retraction after medication is discharged;
- Non-exposure of needle after automatic retraction;
- Requires minimum training;
- Fixed needle, low dead space;
- Reduces disposal size and cost of waste disposal;

一次性使用精密过滤输液器 Disposable precision infusion set

精密过滤 Precision filter

精密过滤器能过滤掉直径≥5μm的不溶性微粒,滤除率>95%,当药液达到精密过滤装置时,不溶性微粒被截留,有效的阻止了药液中不溶性微粒进入血液,对人体产生危害。

Precision filter can filter diameter $\ge 5 \mu m$ insoluble particles, the filtering efficiency is > 95%, when the solution arrive the filter, the insoluble particles trapped, to stop them enter into blood and harm human body.

² 自动止液 Auto stop liquid

药物在输液结束时,能够在过滤器以下及时自 动止液,延迟回血,从而让患者真正的安心, 减少护士工作压力。

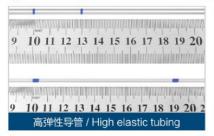

When infusion is finished, the solution below the filter can auto stop, delay blood return, to ensure patients really feel at ease, reduce the work pressure of nurses.

多 自动排气 Autovent

能将过滤器上导管中的气体经由过滤器 自动排出,防止气体进入患者血管,减 少传统式的排气步骤。

The gas through the filter can be automatically discharged through the filter to prevent gas from entering into patient's blood vessels, reduce the traditional exhaust operation.

⊕ 细节展示 / Details description

│一次性使用输液器 带针 Disposable infusion set with needle

- 适用于重力输液
- 医用级无毒PVC材料制成
- 加药口: Y型三通、乳胶管
- 标准螺口接口带药液过滤膜,安全不易脱落
- 包装材料: PE袋或纸塑袋
- 产品经环氧乙烷灭菌、无热源
- Apply to gravity infusion
- Made of Medical grade non-toxic PVC
- Injection Port: Y Type 3 ways、latex tubing
- Standard Luer lock Connector with medicament
- filter membrane, safety and not easy to detached
- Package: PE bag or Paper-poly pouch
- EO gas sterilized, pyrogen-free

一次性使用输液器 Disposable infusion set

- 适用于重力输液
- 医用级无毒PVC材料制成
- 适用于输液瓶或输液袋
- 注塑滴斗带药液过滤膜
- 可选配:标准直口、螺口接口、针头及Y型三通加药口
- 包装材料: PE袋或纸塑袋
- 产品经环氧乙烷灭菌、无热源
- Apply to gravity infusion
- Made of Medical grade non-toxic PVC
- Suitable for infusion bottle or infusion bag
- Injection drip chamber with medicament filter membrane
- Optional: Standard Luer Slip, Luer Lock Connector, Needle and Y Type 3 ways injection port
- Package: PE bag or Paper-poly pouch
- EO gas sterilized, pyrogen-free

一次性使用精密过滤输液器 Disposable precision infusion set

- 适用于重力输液
- 进口医用级高弹性材料制成,柔软不易打折
- 适用于输液瓶或输液袋
- 流量调节器:人性化设计,流畅、精准、舒适
- 精密过滤、自动排气、自动止液三效合一
- 包装材料: 纸塑袋
- 产品经环氧乙烷灭菌、无热源
- Apply to gravity infusion
- Made of imported medical grade high elastic material, soft and not easy to bend
- Suitable for infusion bottle or infusion bag
- Flow regulator: Humanization design, fluent, precise, comfortable
- Precision filter, Auto vent, Auto stop liquid, three functions in one
- Package: PE bag or Paper-poly pouch
- EO gas sterilized, pyrogen-free

- Made of medical grade polymer material, non-toxic and no stimulation
- Connector accord with ISO standard, match with all Anesthesia & Breathing machines, secure connection, reliably sealing
- L type connector with detection port for sampling and testing easily.
- Water traps can collect condensate water from breath circuit.
- Single use and avoid cross infection
- Size: Adult and Pediatric

◆ 零部件介绍 / Components introduction

■ 细菌过滤器(人工鼻) Disposable bacterial filter

一次性使用细菌过滤器采用医用级高分子材料制造,主要用于呼吸机及麻醉机管路中过滤细菌,微粒及增加气体湿热程度(保温保湿),并能有效防止患者之间交叉感染,是呼吸机麻醉机配套使用的一次性医疗器械(俗称人工鼻)。本产品为一次性使用产品,经环氧乙烷灭菌,无菌,无毒;无棱角的安全外形设计,适用于儿童和成人。

Disposable bacterial filter made of medical grade polymer materials, mainly used to filter bacteria, particles and increase gas heat and humidity degree (heat-insulating humid-holding) in the tube for breathing and anesthesia machine, effectively prevent patient cross infection and mainly used as medical accessory. The product steriled by EO gas, non-sterile, non-toxic; no sharp edges with safety design, suitable for child and adult.

■ AGSS麻醉废气传输回收系统 AGSS-Anaesthetic gas scawenging systems

- 静音设计, 免打扰
- 免打孔安装,兼容所有品牌和型号麻醉机
- 带有负压流量阀,可控制负压流速大小
- 与负压管连接采用快插接头,连接快速方便
- 底部密封设计,防止液体进到AGSS内部可
- 根据手术室情况,配备相应的气体接头
- 性能稳定,对麻醉机正压和负压不会产生任何影响
- 完美兼容德尔格、GE、迈瑞等具有侧面导轨的麻醉机
- Silent design, undisturbed
- Punch-free installation, compatible with all brands and models of anaesthetic machines
- With a negative pressure flow valve, the size of the negative pressure flow rate can be controlled
- The connection to the negative pressure tube is quick and easy with a quick plug connector
- The bottom seal is designed to prevent liquid from entering the AGSS interior
- Depending on the operating room, the appropriate gas connector is provided
- The performance is stable and has no effect on the positive and negative pressure of the anesthesia machine
- Perfectly compatible with Delger, GE, Murray and other anesthesia machines with side rails

Comfortable & soft nose tip

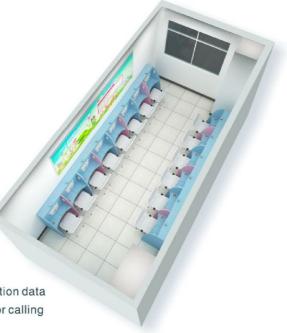

一次性使用雾化器 Disposable nebulizer kit

一次性使用雾化器主要由雾化芯、药物杯、输 气管、咬嘴或面罩及松紧带组成。

相对于传统的服药治疗哮喘等呼吸道的疾病的 手段,一次性使用雾化器将药液雾化成微小颗粒, 药物通过呼吸吸入的方式进入呼吸道和肺部沉积, 湿化气道,稀释痰液,从而达到无痛、迅速有效治 疗,可以普遍用于各种呼吸道疾病。 Disposable nebulizer kit is consisted of nebulization core, medicine cup, oxygen tube, mouth piece or mask and elastic cord. Compared to the traditional medication treatment against asthma and other respiratory diseases, Disposable nebulizer kit atomize liquid medicine into small particles, the drug inhaled into respiratory tract through breathing and depositing in the lung, to humidify the airway and dilute the sputum, thus to achieve painless, rapid and effective treatment, it can be commonly used in a variety of respiratory diseases.

智能雾化控制系统 Smart atomization control system

- 气体分配与控制
- 医用压缩空气分配系统
- 压力异常处理
- 常规雾化控制与状态同步
- 雾化流量模式设置与切换
- 娱乐与患教
- 软件远程更新,雾化位数据独立上传
- 雾化管理,设备管理,排队叫号,患教管理,系统个性化设置
- 便捷功能:用户处方记忆,时间及用药方案设定等
- Distributing and controling of gas
- Handling abnormal pressures
- Setting and switching for the atomisation flow mode
- Remote update of the software, independent upload of nebulisation data
- Nebulisation management, equipment management, queuing for calling
- Patient education management, system customisation

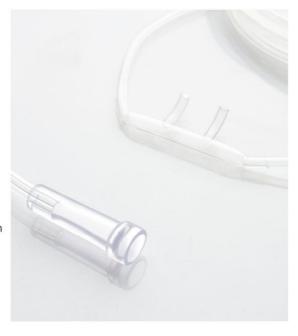

一次性使用无菌供氧管 Disposable nasal oxygen cannula

➡ 产品说明 / Product Information

- 医用级无毒高分子材料制成,柔软透明
- 供呼吸困难、缺氧病人输氧使用
- 类别: 双腔、单腔
- 规格:成人、儿童、婴儿
- 包装材料: PE袋或纸塑袋
- 产品经环氧乙烷灭菌
- 鼻塞用料柔软、有弹性,无气味,对鼻腔刺激小
- 耳挂式结构设计,使用舒适,易固定更安全
- 管体为梅花型加强管壁设计,抗挤压、防变形, 保证供氧通道畅顺
- Made of non-toxic, medical grade polymer material, soft and transparent
- Use for patient who has dyspnea, anoxia
- Type: one way tip and two ways tip
- Size: Adult, Pediatric, Neonate
- Package: PE bag and Paper-poly pouch
- EO gas sterilized
- Soft and light nasal tip, flexible, odorlessness, less nasal irritation
- Over-the ear-style fits easier, ensure conform and safety
- Wintersweet lumen tubing, anti-crush, ensure smooth oxygen transportation

吸氧面罩 Oxygen mask

雾化面罩 Nebulizer mask

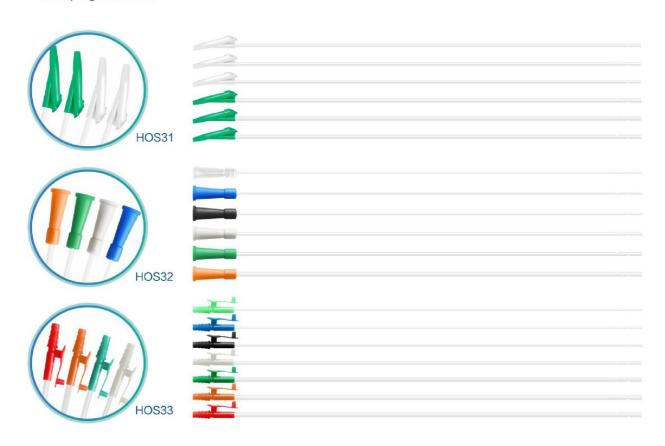

■ 一次性使用无菌吸痰管

Disposable suction catheter

- 医用级无毒PVC材料制成
- 分透明管与磨砂管两种
- 包装材料: PE袋或纸塑袋
- 产品经环氧乙烷灭菌
- 接头采用色标区分规格,接头类型分为飞机头、手控式接头及喇叭头
- 平滑的侧孔及开口末端处理,有效减少插管时对食道黏膜的损伤。
- Made of medical grade non-toxic PVC
- With transparent tube and frosted tube
- Package: PE bag and Paper-poly pouch
- EO gas sterilized
- Color-code connector for identification of different sizes, with connectors of airplane type, finger control type and funnel type
- Perfectly smooth side eyes and opened distal end for less hurt to esophageal mucosa.

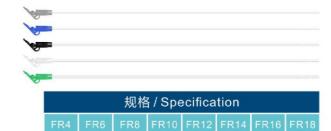

规格 / Specification								
FR6	FR8	FR10	FR12	FR14	FR16	FR18	FR20	

一次性使用无菌喂食管

Disposable feeding tube

■ 一次性使用无菌胃管

Disposable stomach tube

规格 / Specification								
FR6	FR8	FR10	FR12	FR14	FR16	FR18	FR20	

■ 一次性使用无菌导尿管

Disposable nelaton catheter

■ 一次性使用无菌肛门管

Disposable rectal catheter

规格 / Specification
